

FIR & IIR Filter Design Techniques

Subject: Digital Signal Processing (EC3501) | Unit 2

Contributed by: Sanjay JN | Verified Resource

CORE CONCEPTS & LECTURE SUMMARY:

- Comparison of Linear phase FIR filters with Infinite Impulse Response (IIR) filters.
- Windowing methods: Rectangular, Hamming, Hanning, and Blackman windows.
- Bilinear Transformation and Impulse Invariance for analog-to-digital mapping.
- Frequency response characteristics and pole-zero constellation mapping.
